Definition of Done (DoD)

- Code implemented and peer-reviewed.
- All acceptance criteria for the user story have been implemented and validated.
- Positive and negative scenarios have been tested
- Relevant documentation has been updated (e.g., README, APIs...)
- The story has been demonstrated and validated by the Product Owner
- No critical bugs or blockers were found during testing
- For stories with a visual impact, the design has been validated by the UI/UX owner.

Definition of Ready (DoR)

- The story **must include** clear and testable **acceptance criteria**.
- The story **must have story points estimated** by the team during sprint planning, based on shared understanding
- The story **must include a test strategy**, specifying **unit, integration, and/or end-to-end** tests aligned with the acceptance criteria.
- If **third-party** services are required, they **must be activated, configured, and tested** in the development environment.

INSER CUSTOMER AS PERSON

+ Add @ Apps

To Do ⚡

Story point estimate3

Description

Acceptance Criteria:

☐ AS USER, I WANT to REGISTER a customer as person into a simple form SO THAT I can centralize the data from customers.

☐ AS USER, I WANT to register a customer with unique CPF (CNPJ), PHONE and EMAIL, SO THAT can avoid customers data conflicts.

☐ AS USER, I WANT to validate the format of CPF SO THAT can avoid data inconsistency.

☐ AS USER, I WANT to register the anual revenue from customer SO THAT I can validate the risk of the leases associated with the customer.

Definition of Done (DoD)

• Code implemented and peer-reviewed.

• All acceptance criteria for the user story have been implemented and validated.
